

## Chinese Weekly Influenza Surveillance Report

**December 1 to 7, 2025 (Week 49)**

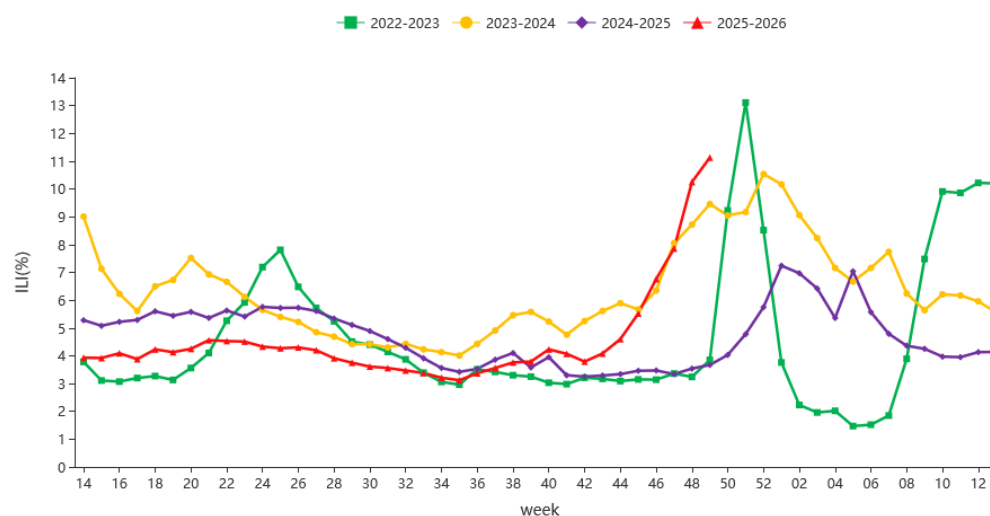

(All data are preliminary and may change as more reports are received)

### Summary

- The positive rate of influenza virus testing has increased in southern provinces, with several provinces experiencing a decrease in positive rates. The positive rate of influenza virus testing has shown a decrease in some northern provinces. There were 1219 ILI outbreaks reported in this week.
- Among influenza viruses antigenically characterized by CNIC since March 31, 2025, 1091(97.8%) influenza A(H1N1)pdm09 viruses were characterized as A/Victoria/4897/2022-like; 415(49.9%) influenza A(H3N2) viruses were characterized as A/Croatia/10136RV/2023(egg)-like, 689(82.8%) influenza A(H3N2) viruses were characterized as A/District of Columbia/27/2023(cell)-like; 313(97.5%) influenza B/Victoria viruses were characterized as B/Austria/1359417/2021-like.
- Among the influenza viruses tested by CNIC for antiviral resistance analysis since March 31, 2025, all but 31 influenza A(H1N1)pdm09 were sensitive to neuraminidase inhibitors, all A(H3N2) and B viruses were sensitive to neuraminidase inhibitors; all A(H1N1)pdm09, A(H3N2) and B viruses were sensitive to influenza polymerase inhibitors.

### Surveillance of outpatient or emergency visits for Influenza-like Illness (ILI)

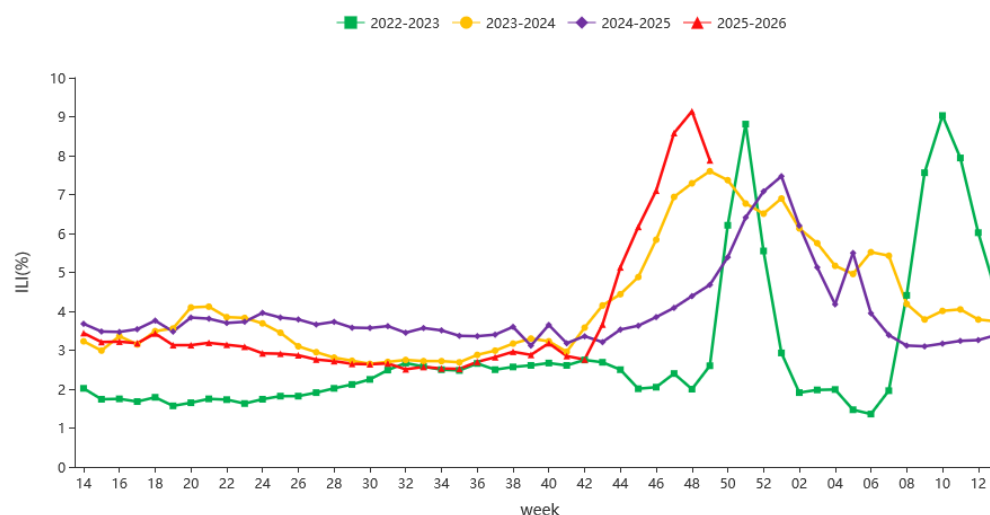

During week 49, the percentage of outpatient or emergency visits for ILI (ILI%) at national sentinel hospitals in southern provinces was 11.1%, higher than the last week (10.3%), higher than the same week of 2022, 2023 and 2024 (3.9%, 9.5% and 3.7%). (Figure 1)

During week 49, ILI% at national sentinel hospitals in northern provinces was 7.9%, lower than the last week (9.1%), higher than the same week of 2022, 2023 and 2024 (2.6%, 7.6% and 4.7%). (Figure 2)

## Virologic Surveillance

During week 49 of 2025, influenza network laboratories tested 22381 specimens, there were 11138 positive detections for influenza. The number and proportion of influenza types and subtypes detected in southern and northern provinces were shown in Table1.
